My U.S. Network was created by businesses for businesses. The premise - "A Network of Businesses", enabling businesses to network together in order to save overall advertising expenditures - passing the savings along to the consumers.

Auto Technologies Inc. has provided marketing for multiple industries since 2001. Many businesses were unable to utilize some of the traditional marketing avenues available to them due to the high investments.

My U.S. Network allows business to join forces, and resources, affording them the opportunity to participate in traditional Direct Mail Promotions, Email Broadcast Advertising, combined with Call Tracking, Web-based directory advertising/Listings which include business "Deal of the Day", Lead Generating and Coupon Deployment.

No longer will only the large businesses have the advantage of saturating their targeted markets through more costly traditional and digital marketing mediums.
